

LabelRIGHT for Windows

£143 / €210

LabelRIGHT for Windows offers the most powerful labelling programme available at any price and it prints faster than other Windows bar coding programmes! Design any format, any size label; add graphics, bar codes, lines or boxes - the possibilities are endless!

- Unlimited fields per label
- Scalable fonts 3-375 points
- True Type and Postscript
- 14 Bar Code Types and PDF 417
- Any format or size
- Field centering
- Any number of columns and rows
- Serialization flexibility
 - one or multiples per label
 - same or different increments
- Multiple bar code densities

Our Full Featured Graphical Interface

- mm, inches, or points
- Variable line and box thickness
- Portrait or Landscape
- Import graphic image files
- Import ASCII or DBF data files
- Page overlay for catalogue formats
- For Windows 95, 98, 2000, ME, NT & XP
- Complete Package - £143 / €210

Applications include:

- shelf, shipping, pallet, and storage labels
- name tags, catalogues
- route accounting
- custom scanning menus for job cost or test reporting
- eye readability at over 40 metres

Special industry formats furnished:

- Odette
- HIBCC
- MHIO.8M
- Automobile Industry Action Group
 - AIAG B-5 Primary Metals
 - AIAG B-3 Shipping Parts/Identification
 - Ford, GM, Chrysler, Caterpillar, etc.
 - AIAG B-2 Vehicle Identification
 - AIAG B-2 Unit Packaging
- AIAG B10 specifications
- GM 1724

Bar codes supported are:

- Zip+4, Codabar, Code 128, I 2 of 5
- UPC Shipping Container
- PDF 417
- EAN-128, UCC/EAN 128
- EAN-8, EAN-13, UPC-A, UPC-E, MSI
- Code 39 and Full ASCII Code 39

Bar codes can be printed from 2mm tall to 18cm tall. Up to 5 bar code densities can be selected, complying with most known bar coding standards.

Design Interface

The design interface takes full advantage of Windows facilities to give you a viewable label on the screen as you design it with pull down menus. Lines, boxes, rotations, and multiple bar code densities are easily specified. Tools for page overlay, grids, cut, paste, copy, undo, zoom, and a field status line all make the label design powerful but simple. The entire manual is online for help. Very complex labels can be quickly and easily designed and then saved to disk for later retrieval.

Outstanding Font Support

You can print labels with fully scalable text from 3 to 375 points in height (that's over 13cm high!) in landscape or portrait orientation.

Any font you have installed with Windows can be used with LabelRIGHT; plus, LabelRIGHT comes with TrueType bar code fonts and OCR fonts. Text fonts can be rotated in any orientation from 0-360 degrees.

Bar code fonts can be printed at 0, 90, 180, and 270 degree rotations. You can mix different rotations on the same label. Bar code fonts are optimized dot matrix, inkjet and laser printers.

OMS International

"...If one of our clients require bar code labels, either connected to its EDI messages or as a stand alone application, we have always used LabelRIGHT to provide the solution. LabelRIGHT is easy to install, easy to set up and easy to use. This makes it a cost effective solution as we can get it working in a very short space of time. We have no complaints or problems with LabelRIGHT. When we do need to use the help desk, its response is quick and effective."

Print any format, any size label with LabelRIGHT!

Laser fonts are optimized for 300, 600 and 1200 dpi. Using these optimized fonts, it's virtually impossible to print out-of-spec bar codes. Font installation and downloading is automatic. Bar codes can be printed as a bitmap image as well.

Simple Custom Operator Interface

Using LabelPROMPTS™, the label designer can create a simple operator interface programme in which the operator answers a series of simple questions. Labels are then printed automatically. LabelBASE™, a programme to create and maintain a database of labels, is also included.

Printing Scanned Images

For logos, product images, and symbols, LabelRIGHT includes the ability to import and print a variety of graphic image file types. This allows you to print scans of products on labels or entire catalogues.

All Sizes of Label Stock

LabelRIGHT allows formatting one label in the top left corner that can be horizontally and vertically replicated, creating an entire page of labels from one label definition. Each individual label can vary in data content with auto-incremented data, plus data read from an ASCII text disk file. Some common label sheet formats are included - you can also save custom page formats for later use as well.

Data File Input

Data to be printed can be specified on the label design screen or data can be entered from a ASCII

text file created by such applications as Word, Write, Notepad, Excel, Access, etc., or even downloaded from your mainframe. ASCII and DBF file input is supported.

Required Hardware/Software

A PC running Windows 95, 98, 2000, ME, NT or XP with the minimum Windows requirements and 20 MB of hard disk space.

Full InkJet Support

See our website for information on our Worth Poly™ Polyester Laser Label Stock - you won't find a more durable label!
